

ANDRY SYVA MALDINI

IT Specialist | Data Engineer | Data Analyst

Date of Birth: Surabaya, 13 May 2002

Surabaya, Indonesia | Open Placement in Jakarta

andrymldni@gmail.com | 085895812699 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

SUMMARY

Adaptable IT Specialist and **Data Science graduate** specializing in data engineering, analytics, automated workflows, and **enterprise BI solutions**. Demonstrated success during an internship at **BRI's BRILink Business Group** in transforming complex datasets into **actionable business intelligence**. Proficient in **Python, SQL, Apache Airflow**, and **GCP**, with a strong focus on system reliability, **MLOps**, and operational efficiency.

EXPERIENCE

Data Analyst Intern (IT & Data Systems) Nov 2025 – May 2026
PT Bank Rakyat Indonesia – Jakarta

- Extracted, cleaned, and validated transactional data across multiple branch systems using **SQL** and **Python**, ensuring **data integrity** across core banking systems.
- Built and maintained **Power BI dashboards** and **automated reporting tools** to monitor transaction volumes, system performance, and key operational KPIs.
- Applied **statistical analysis** and **K-Means Clustering** to support business strategy, working closely with business stakeholders and technical teams to translate technical findings into **operational decisions**.

Machine Learning Cohort (MSIB) Kampus Merdeka Feb 2024 – Jul 2024
Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka – Online

- Engineered a **CNN-based** plant leaf disease detection model through end-to-end data curation, image augmentation, and hyperparameter tuning, achieving **over 98% evaluation accuracy**.
- Translated complex machine learning outputs into **actionable insights** by mapping predicted disease classifications to specific treatment plans, improving practical usability and **business value**.
- Ensured effective cross-functional collaboration and clear technical documentation, backed by a **96% proficiency score** in English for Business Communication.

Data Analyst Intern (Systems & Reporting) Jul 2023 – Dec 2023
BPJS Ketenagakerjaan Cabang Tanjung Perak – Surabaya

- Processed, cleaned, and validated **over 7,000 participant records** to maintain data accuracy and consistency across operational systems.
- Developed **Python automation scripts** for data cleaning and reporting workflows, improving processing efficiency **by 15%, reducing manual effort**.
- Created dashboards and analytical reports to communicate findings and support **data-driven recommendations**.

EDUCATION

Bachelor of Data Science – GPA 3.71/4.00 Aug 2021 – Jul 2025
Universitas Pembangunan Nasional Veteran Jawa Timur

- **Relevant Coursework:** Data Science, Data Analytics, Data Engineer, Machine Learning, Database Systems
- **Technical Exposure:** Python, SQL, Apache Airflow, Oracle, Linux, Docker, Git, AWS, Google Cloud Platform

VOLUNTEER EXPERIENCE

Google Cloud Next25 Jul 2025 – Aug 2025
Logistic Division – Google Developer Group (GDG) Surabaya

- **Directed logistical operations** and spatial arrangements for a **large-scale tech event**, ensuring all vendor and sponsor requirements were flawlessly executed.
- **Optimized front-of-house operations**, **reducing registration bottlenecks** and ensuring smooth transitions for attendees between event sessions.

CERTIFICATIONS

- **Junior Web Programmer Certificate of Competence | Badan Nasional Sertifikasi Profesi (Dec 2024)**
Tools & Skills: Data Structures, UI Implementation, Structured Programming, Code Documentation, Debugging.
- **Machine Learning Operations (MLOps) | Dicoding (Oct 2024)**
Tools & Skills: CI/CD, Model Deployment, Data Pipelines.
- **Google Data Analytics Professional Certificate | Coursera (Jul 2024)**
Tools & Skills: SQL, R, Tableau, Data Visualization.
- **DeepLearning.AI TensorFlow Developer | Coursera (Apr 2024)**
Tools & Skills: Deep Learning, CNN, Natural Language Processing (NLP), Time Series.
- **Google IT Automation with Python Professional Certificate | Coursera (Mar 2024)**
Tools & Skills: Python, Bash, Linux, Git/GitHub, IT Automation.

PROJECT EXPERIENCE

Employee Churn Prediction & Retention Strategy
Dicoding Project

October 2024

- Designed and developed an **interactive HR Analytics dashboard** to effectively visualize key workforce metrics, performance trends, and employee turnover patterns.
- Built an **end-to-end HR data pipeline** for cleaning, transformation, and aggregation to **improve reporting accuracy**.
- Deployed the dashboard application using **Docker containers** to guarantee environment consistency and facilitate seamless integration across multiple platforms.

NLP Text Classification for Stress and Anxiety Detection
Dicoding Project

September 2024

- Engineered an end-to-end machine learning pipeline utilizing the **TensorFlow Extended** (TFX) framework to accurately predict human stress levels.
- Constructed robust data validation components, including **CsvExampleGen**, **StatisticsGen**, **SchemaGen**, and **ExampleValidator**, to maintain dataset integrity and proactively **detect anomalies**.
- Containerized the entire pipeline environment using **Docker**, establishing **deployment standardization** and seamless portability across various server infrastructures.

Automated Assessment Prediction Using Multi-Layer Perceptron
Dicoding Project

September 2024

- Developed a **predictive machine learning model** to forecast professional certification passing rates based on participants' learning histories, aiming to **mitigate assessment subjectivity**.
- Executed end-to-end data preprocessing on a **20,000-row dataset**, performing median imputation for missing values, feature standardization, and optimal train-test splitting.
- Achieved a **95.35% prediction accuracy** using the optimized MLP model, **outperforming the baseline KNN (93.40%)** and demonstrating a strong capability in identifying non-linear data patterns.

SKILLS & LANGUAGES

- **Technical Skills**
MLOps, CI/CD, ETL, Data Engineer, Data Modeling, Data Cleaning, Data Validation, Data Pipeline.
- **Tools**
Python (NumPy, Pandas, Scikit-learn), SQL (PostgreSQL, BigQuery), Google Cloud Platform (GCP), Linux, Docker, Git/GitHub, Apache Airflow, TensorFlow, Power BI (DAX, Power Query), Tableau, Flask, Streamlit, Railway.
- **Core Competencies**
Scalable Data Architecture, IT Automation, Enterprise Business Intelligence, System Reliability & Troubleshooting, Data-Driven Decision Making, Cross-functional Collaboration, Analytical Problem Solving.
- **Languages**
Indonesia (Native), English (Professional Working Proficiency)
